The Story Behind LOHO

LOHO is a Belgian design office located in Bruges, Belgium. Founded in 2017 by Karel Loontjens and Jo Hoeven, the studio focused from the beginning on high-end bespoke interior projects, forming an ideal foundation for product and material design that is both innovative and durable. With an extensive background in application of wall materials, LOHO gradually developed significant technical inhouse expertise.

Crafting our most refined collection of unique Objects & Materials, made of pure and natural resources.

LOHO Materials was born from the same philosophy as LOHO Objects: a deep-rooted passion for natural, honest materials and a commitment to sustainability in design. While LOHO Objects focuses on unique, custom-made pieces, LOHO Materials extends this vision to high-quality wall and floor surfaces that have a lasting impact on our living environment.

Our collection consists of carefully developed materials, each designed with a specific purpose and a natural origin. We consciously choose compositions that are not only timeless but also contribute to a healthy and sustainable indoor climate. From clay to lime, our materials are crafted to offer both architectural and functional value, always with respect for people and the environment.

By embracing authentic raw materials and artisanal techniques, we remain true to our mission: to create materials that go beyond trends and genuinely enhance the way we live and build. LOHO Materials is an invitation to construct with pure, honest materials—a choice for sustainability, beauty, and meaningful architecture.

LOHO Values

LOHO works according to a perfect blend of three core values that guides every creation. We honor the authenticity of natural materials, craft with ecological responsibility and design with timeless vision. It's more than a philosophy, it's the DNA of LOHO.

01. Built for Generations

In the way we create, we use natural, honest materials and avoid toxic substances. In the way we operate, we focus on waste reduction and the reuse of materials. In the way we collaborate, we build a people-centered organization rooted in trust. We strengthen our impact through local partnerships and local sourcing.

02. Performance

Our products are defined by thoughtful, enduring designs. They integrate quality-adding features that enhance performance and usability. Each product is carefully suited to the right application, ensuring relevance and effectiveness. We offer a portfolio of solutions built around clear, expectation-oriented outcomes.

LOHO Wall Materials 2026

03. Timeless Beauty

We create with imagination and intention, reconnecting people to nature and meaningful memories. Through a thoughtful balance of form and function, warmth and serenity, we set new standards that shape emerging trends. We elevate natural materials into expressive elements that define beauty and authenticity.

LOHO Values

LOHO

Europe's Finest Quarries

At LOHO, we source lime and clay from Europe's finest quarries to create wall finishes that evoke a genuine atmosphere and promote a healthy living environment. Each of our wall materials — from smooth lime plasters to tactile clay skins, is designed to transform walls into timeless surfaces. Our commitment to quality ensures that every finish reflects the highest standards of purity and excellence, offering architects, designers, and contractors natural alternatives to conventional wall coverings.

Wall Materials

[Click titles to navigate](#)

Three wall materials,
very alike but different.

Wall Skin

LOHO Wall Skin is a ready-to-use mineral finish that can be applied to a variety of surfaces, from furniture & woodwork to plastered walls. It brings depth and tactility to your interior walls. Highly versatile, it enables a wide range of designs and textures.

Clay Finish

LOHO Clay Finish is a natural plaster that regulates humidity and creates a healthy indoor climate. Best applied on interior walls and ceilings, it is ideal for living rooms and bedrooms where comfort, sustainability, and subtle texture come together. The most natural plaster.

Lime Finish

LOHO Lime Finish is a breathable mineral plaster based on natural lime, valued for its rich character and depth of color. Its natural composition creates nuanced, living surfaces with subtle variations that evolve with light and touch. From fine to raw textures, it is suited to restoration, new construction, and damp spaces such as bathrooms, combining durability with a timeless, deeply expressive aesthetic.

Wall Material Guide

Criteria					
Decorative Level					
Application					
Hardness					
Breathability					
Maintenance					
Reparation					
					
Indicates the visual richness of the finish — from subtle, uniform surfaces to expressive textures with depth, movement and character.	Reflects how intuitive the material is to apply. Influenced by packaging, build-up system, drying time, layer thickness, required tools, finishing options and the number of installers needed for larger surfaces.	Describes the rigidity of the finished surface and its resistance to daily wear. Harder finishes are less sensitive to small impacts and better suited for spaces with intensive use.	Indicates the material's ability to self-regulate the indoor climate. Breathable finishes help manage humidity, absorb odours and contribute to acoustic comfort.	Refers to how easily the surface can be cleaned. This includes dust removal, stain resistance and how the finish reacts to water during cleaning.	Shows how seamlessly local damage can be repaired. Materials with a high repair score allow touch-ups without visible transitions.

Wall Skin

LOHO

← BACK

LOHO Wall Skin can be applied to a variety of surfaces, from furniture & woodwork to plastered walls. Combining the strength of paint and plaster and specifically developed for indoor applications, Wall Skin provides a versatile solution for both painters and plasterers.

Wall Skin Fine

[← BACK](#)

LOHO Wall Skin Fine contains the smallest grain size, resulting in a delicate texture and a sophisticated, smooth appearance. By varying the application technique, a wide range of decorative effects can be achieved—from soft, cloudy movements to brushed textures or an ultra-smooth finish, as on the cupboards in this project.

Doors: WSF. Project by Benoît Viaene, Photo by Tijs Vervecken

LOHO Wall Skin offers a unique look and feel, closely resembling natural Clay Finish. It is specially suited for surfaces more prone to wear, such as doors and railings - making it possible to apply the same finish throughout almost the entire home. Thanks to its scratch-resistant and durable properties, Wall Skin is ideal for high-traffic areas, while maintaining a refined, timeless appearance.

Wall Skin Medium

Wall Skin Medium, Project by Simon De Burbure, Photo by Tijs Vervecken

LOHO Wall Skin Medium features a more pronounced grain, adding depth and character to the finish. It strikes the perfect balance between smooth and rustic, creating a harmonious texture throughout. Applied across walls, doors, and ceilings, the result is a seamless, unified interior. The soft, cloudy effect reflects a meticulous eye for detail and a passion for craft.

Project by Simon De Burbure, Photo by Tijs Vervecken

LOHO Wall Skin is more than just beautiful and durable, it stands out for its ease of application. This ready-to-use product can be applied with either a brush or a trowel, depending on the desired effect and installation preference. Both plasterers and painters will appreciate its versatility and user-friendly application.

Wall Skin Raw

[← BACK](#)

LOHO Wall Skin Raw features the most expressive grain, offering limitless creative possibilities. By sanding, polishing, or sponging, you can play with the texture and roughness to achieve a truly unique finish. Drying time and choice of tools further influence the final result. Applied to this kitchen cabinet, the Wall Skin Raw beautifully complements the soft & natural materials.

Wall Skin Raw, Photo by Bart Van Leuven

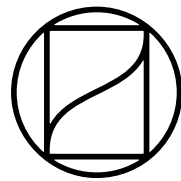

Our Wall Skins are defined by their easy maintenance and lasting performance. These projects showcase the product's versatility—different substrates, different applications, different functions. Wall Skin feels at home anywhere. Whether in your private residence or in commercial environments, it stands the test of time and daily use, combining durability with refined aesthetic appeal.

Clay Finish

LOHO

[← BACK](#)

LOHO Clay Finish is a natural and eco-friendly alternative for interior finishes. Produced without the use of water or fossil fuels, this plaster has the smallest possible ecological footprint. This makes it a conscious choice for architects and building professionals striving for sustainable and healthy living environments.

Clay Finish Fine

45

[← BACK](#)

LOHO Clay Finish Fine turns walls and ceilings into a canvas of elegance. Its silky-smooth texture and delicate interplay of light and shadow create warm, inviting spaces that evolve throughout the day. Perfect for interiors where beauty, refinement, and a timeless sense of style meet.

LOHO Clay Finish is a premium natural plaster, crafted from carefully selected sands, unfired clays, pigments, and minerals. Its breathable composition promotes a healthy indoor climate, making it a natural alternative to conventional finishes. As one of the most sustainable building materials, clay is recyclable, compostable, and, above all, endlessly reusable, bringing both beauty and responsibility to every space.

Clay Finish Medium

[← BACK](#)

LOHO Clay Finish Medium is the perfect plaster for creating tactile, vibrant surfaces that subtly shape and enhance their surroundings. Striking the ideal balance between elegance and durability, it brings character, warmth, and refined texture to every space.

LOHO Clay Finish is a 100% natural material, free from synthetic or toxic components. Its moisture- and temperature-regulating properties create a healthy, comfortable indoor environment. With its rich textures and vibrant, natural color tones, Clay Finish offers a beauty and character that no other product can replicate.

Clay Finish Raw

[← BACK](#)

LOHO Clay Finish Raw is as pure as it gets, with or without added natural granulates. Its raw, rustic texture adds depth and character, creating a striking contrast in contemporary, sleek interiors and giving spaces a distinctive, natural appeal.

LOHO Clay Finish stands out for its ease of repair. By the use of water superficial stains can be removed by using a clean sponge to wipe the surface. Also walls which show profound stains can be restored. Thanks to its through-bodied coloring, chips and scratches are less noticeable and can be easily repaired by applying new material, keeping walls looking beautiful over time.

Lime Finish Fine

Lime Finish Fine, Project by Benoît Viaene, Photo by Tijs Vervecken

[← BACK](#)

LOHO Lime Finish Fine is a well balanced combination of carefully selected sands and lime that forms a porous and strong surface. Applied in multiple layers, this refined lime plaster offers a modern take on the traditional tadelakt finish.

LOHO Lime Finish Fine can be applied to walls throughout residential projects, including splash walls. For these applications, a precise installation process and careful treatment are required to ensure a durable and flawless finish.

Lime Finish Medium

LOHO

LOHO Wall Materials 2026

Lime Finish Medium

71

[← BACK](#)

LOHO Lime Finish Medium is a high-quality, pure hydraulic lime plaster. This finish can be applied in different ways. Despite its granular texture, the surface can be polished to achieve the desired level of refinement. It is also ideal for sanding or experimenting with your own decorative finishing techniques, allowing for truly personalized creations.

Once dried, LOHO Lime Finish Medium forms a hard, wear-resistant wall surface. Alongside our other lime products, we developed it to be easy to apply without compromising its natural character or aesthetic charm. LOHO Lime Finish Medium, meanwhile, is the ideal choice for covering large surfaces efficiently, delivering beauty and durability in less time.
